

## Ozone Therapy Regina

Ozone Therapy Regina - A lot of individuals think ozone has excellent healing properties, whilst others have argued that such claims are non-scientific and that ozone has no proven benefits. For many years, there has been a lot of controversy and debate about this particular topic.

The latest clinical tests have assessed the mechanisms, actions, together with probable toxicity of ozone due to the arrival of precise medical ozone generators. There is a capacity for ozone to oxidize organic compounds. When present in smog, ozone has different well-known toxic effects on the respiratory tract. Advocates of ozone therapy say it has numerous health benefits. The gas is made from medical grade oxygen and in medical use, is administered in precise therapeutic doses, although, never through inhalation.

The majority of states within the US has prohibited the promotion of ozone generators, prohibit the performing of clinical trials in ozone therapy and even prohibit the research on its medical use. There are no health authorities within whichever English speaking countries which endorse the therapeutic use of ozone. The physicians who perform or prescribe these therapy may be at risk to lose their medical licenses. There is anecdotal proof of ozone therapy being useful and even causing remission in a variety of diseases, however, just a few of these life saving administrations have been documented and verified.

### Historical Origins of Ozone Therapy

Just 16 years after it was discovered in the year 1856, ozone was initially utilized in health care in order to disinfect operating rooms and sterilize surgical instruments. The use of ozone to disinfect drinking water of viruses and bacteria was well established within mainland Europe by the end of the 19th century.

During World War I, in 1914 to 1918, doctors were familiar with ozone's antibacterial capacity and with few other medical resources accessible to them, applied it topically to infected wounds. It was found that it had anti-inflammatory properties as well as hemodynamic properties while remedying the infection.

### Evidence of Medical Benefits of Ozone Therapy

Marketers of the ozone generators have made some unlikely promotional claims, including that it is a treatment used for nearly all diseases, like for example cancer and AIDS. These claims remain unproven. Much controversy surrounds ozone therapy itself and the equipment. Critics claim that this alternative has given numerous individuals false hope and that it is therefore rather dangerous.

There are modest claims stating that the narrow use of ozone through injection into synovial fluid and tissues which surround the joints and bones, and not into blood vessels, simply promotes the body's own mechanisms for healing musculoskeletal lesions together with tissue oxygenation and modest inflammation.
